

## Lemonia Anagnostopoulou

### *Position:*

PhD candidate, Researcher

### *Department:*

Medical School, Laboratory of Hygiene and Epidemiology

### *University:*

University of Thessaly, Greece

### *Short Bio:*

Lemonia Anagnostopoulos is a PhD candidate at the Department of Hygiene and Epidemiology at UTH with over 5 years' experience supporting European Union funded projects/joint actions (HEALTHY GATEWAYS, HEALTHY SAILING). She is involved in developing operational guidance documents for public health authorities related to infectious disease in the transport sector, organizing /delivering European training courses, and project monitoring. She currently works on the recently launched research and innovation action funded under the EU's Horizon Europe programme, focused on controlling infectious disease on passenger ships.
